

Business-Technology Alignment IT Architecture Review: Organization and Processes Version 3.2

October 24, 2001

TO: 55

Deliverable #: 55.1.4

DRAFT

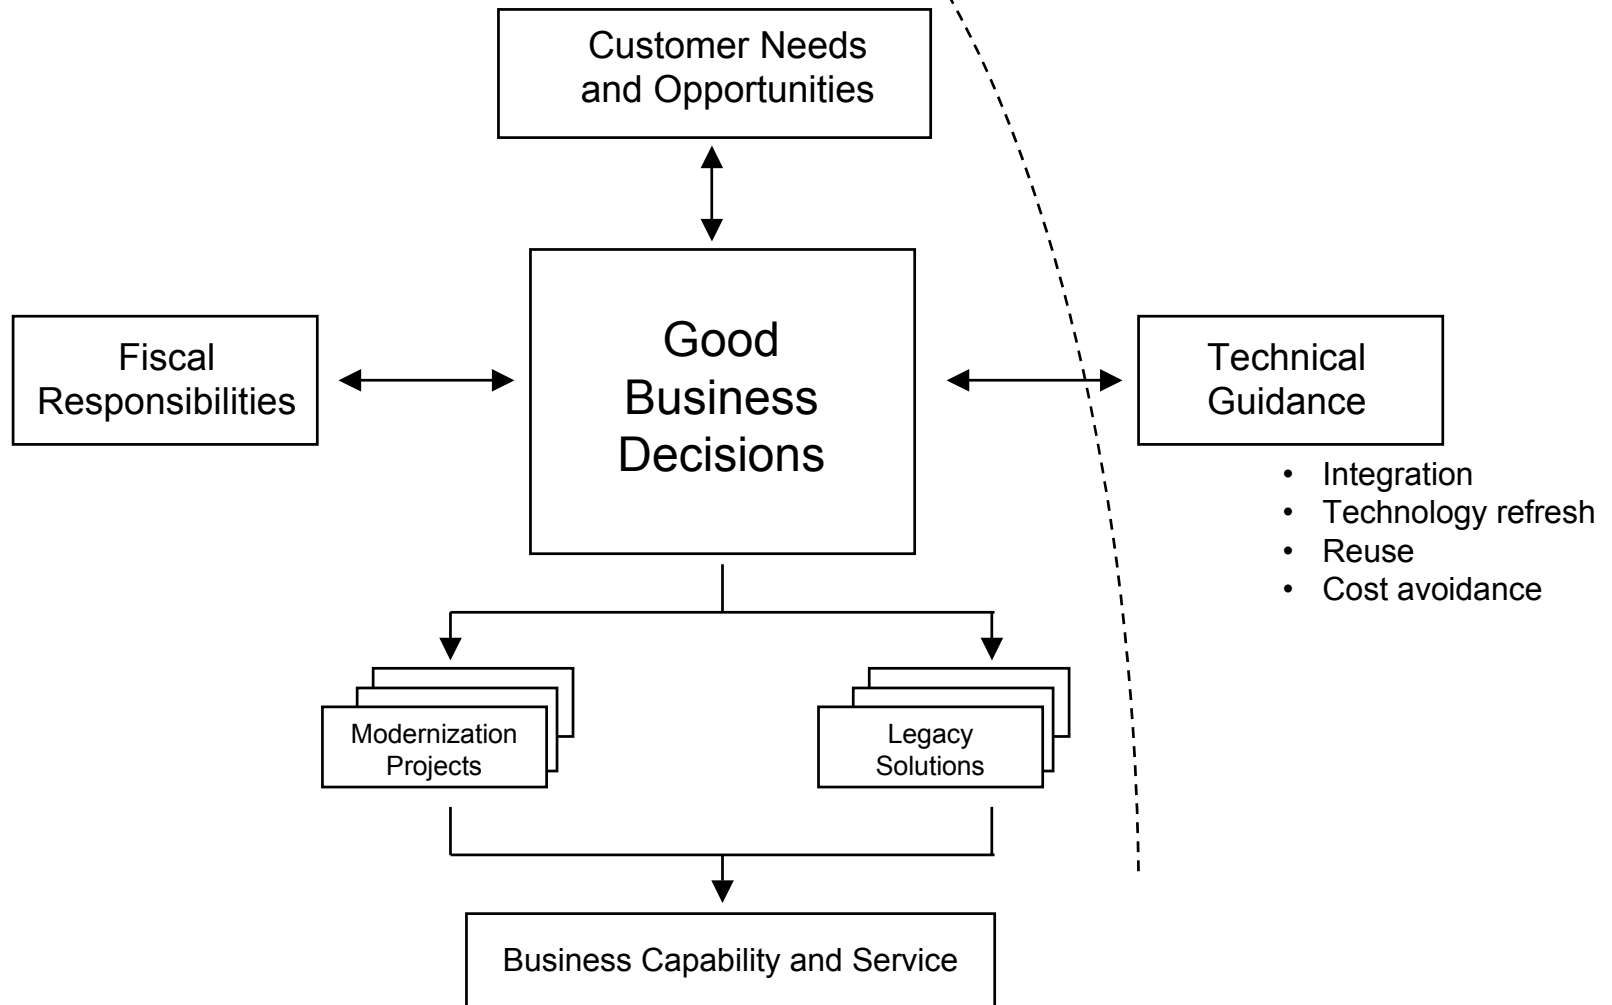

We need to make good business decisions based on sound, relevant information and disciplined processes.

So Far

...We Have Addressed

... Now We Need to Address

SFA's IT Principles drive the design of the Business-Technology Alignment (BTA) processes.

SFA IT Principles

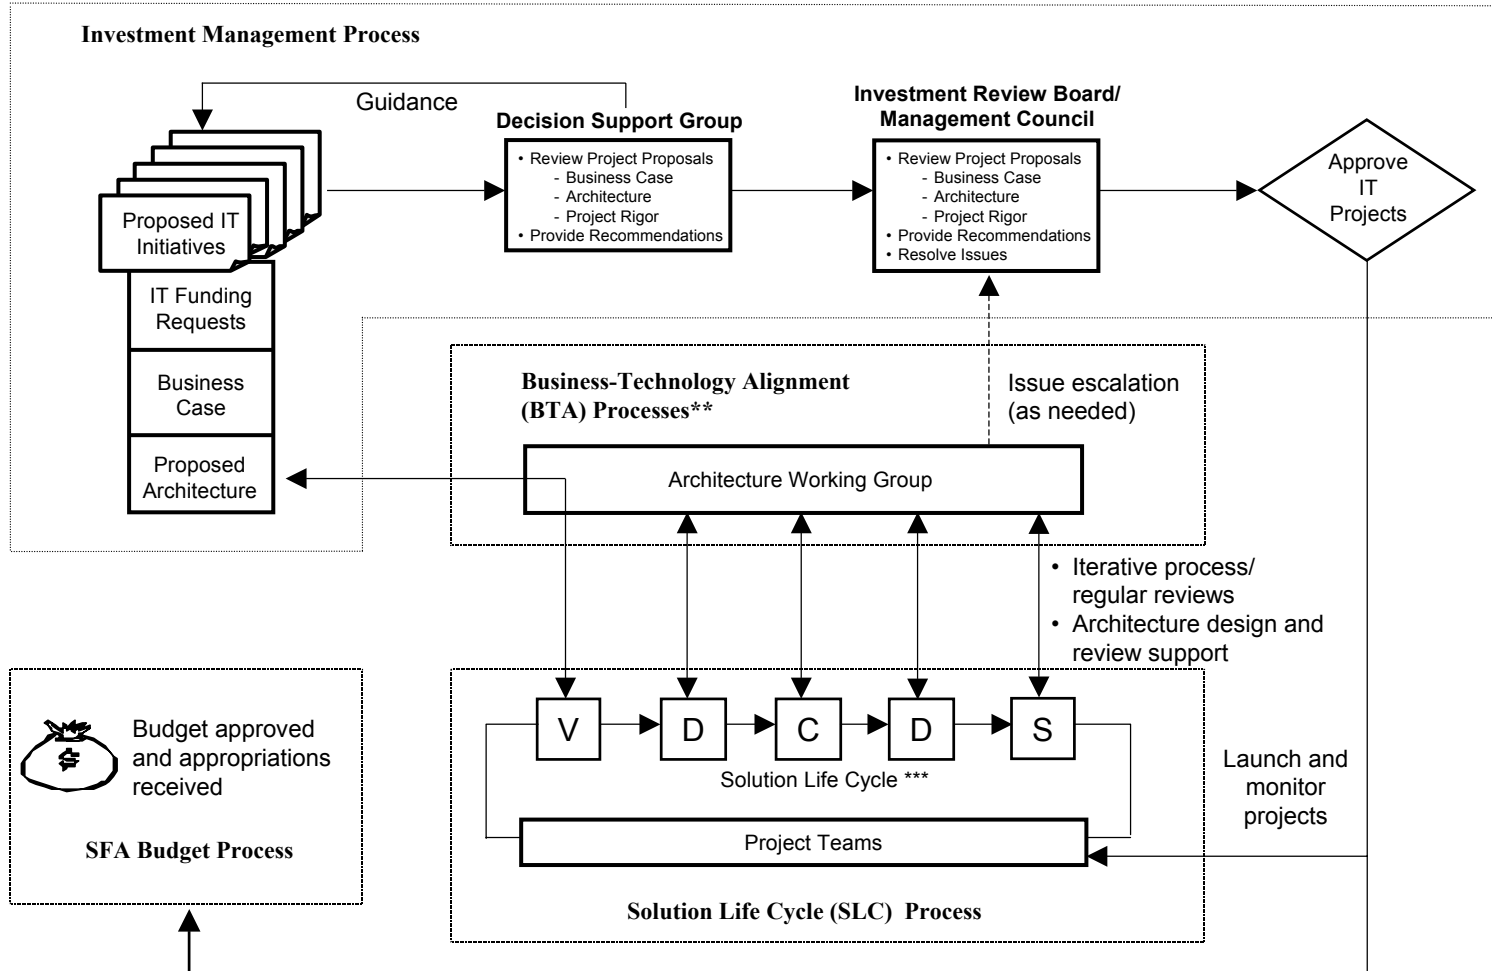

SFA will:

- Base IT decisions upon sound business benefits clearly tied to business drivers and customer impact
- Ensure that at least 75% of the IT working groups will consist of representatives from major business initiatives and/or projects
- Design all IT decision-making processes with a bias towards action
- Manage information and data as enterprise-wide assets
- Support an integrated enterprise-wide IT architecture
- Use guidelines consistent with the Federal ITA framework
- Unify planning, management and alignment of Business and Information Technology
- Typically use technology that has been generally accepted in the market place
- Promote and facilitate reusability of application software and infrastructure components
- Use commercial/government off-the-shelf solutions, typically using open systems standards
- Leverage enterprise-wide licensing of vendor products and services

BTA* processes complement the Investment Management and Solution Life Cycle processes, enabling business priorities to drive technology solutions.

SFA Processes

* Business-Technology Alignment

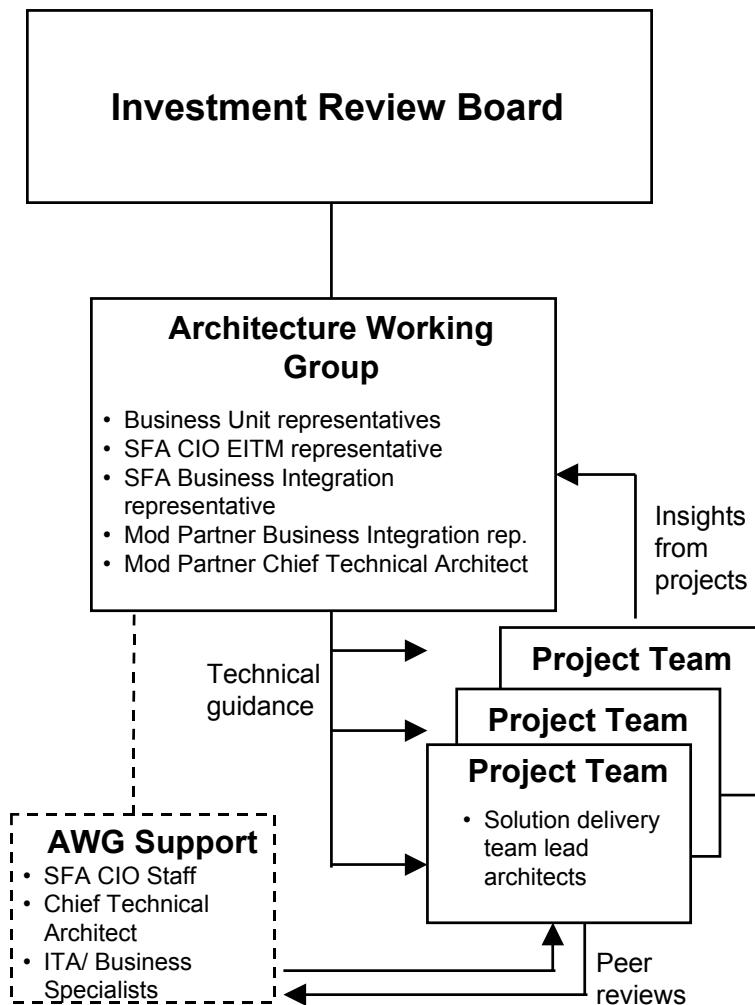

** Enhances compliance with Clinger-Cohen Act

*** Solution Life Cycle Steps: Vision, Design, Construct, Deploy, Support

A combined team of project and technical specialists will help better manage and align SFA's use of technology.

Organization Structure

Key Responsibilities Summary

Investment Review Board:

- ☐ Understand business implications, adjudicate, and set direction

Architecture Working Group Members:

- ☐ “Trusted Advisors” in consultative and coaching roles to projects regarding interpretation of standards, business impact and the reasoning behind the technology choices

Project Teams:

- ☐ Incorporate architecture standards into solution design, or raise request for exceptions where appropriate
- ☐ Provide insights from project experience

AWG Support:

- ☐ Support BTA processes and conduct detailed evaluations

The Architecture Working Group (AWG) and Project Teams ensure architecture integrity of business solutions.

BTA Organization Summary

Architecture Working Group (AWG): Characteristics

- ☐ Permanent members; business representatives and technical architects;
- ☐ At least 75% business representation;
- ☐ Representatives from Business Units, Mod Partner, SFA CIO, and major projects;
- ☐ “Trusted Advisors”: consultation, coaching, mentor roles

Architecture Working Group: Responsibilities

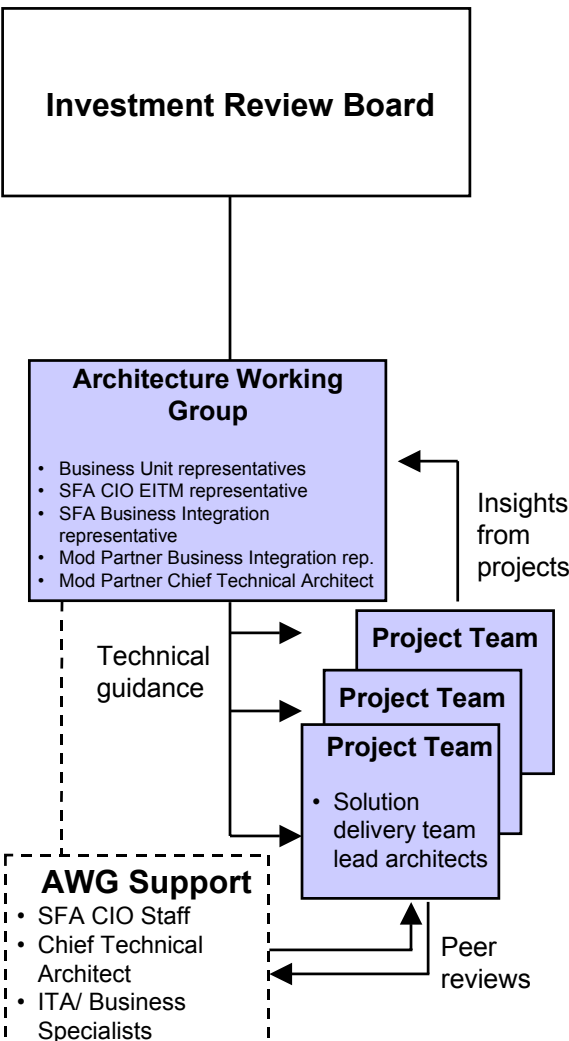

- ☐ Consultative roles to projects, especially during early phases regarding interpretation, impact, the reasoning behind the technology choices, and advise on issues of migration to SFA IT architecture and standards
- ☐ Understand business and technical issues and implications
- ☐ Raise issues/exceptions to IRB for resolution, as necessary
- ☐ Make recommendations (with implications, risks and costs) to IRB for setting direction
- ☐ Determine when smaller or larger changes to architecture are required and shepherd these through the approval process

Project Team Responsibilities Pertaining to BTA

- ☐ Hear and respond to user requests for exceptions to the published standards
- ☐ Bring insights from day-to-day implementation and use of architectures
- ☐ Incorporate architecture standards into solution design, raise request for exceptions where appropriate

Assumption: AWG Support (SFA CIO and Mod Partner) conducts

- ☐ Peer group reviews with Project Teams, and identification of issues for AWG attention
- ☐ Maintenance and publication of architecture documentation
- ☐ Education sessions, publicity, demonstrations of architecture and its business case
- ☐ Driving the overall enterprise architecture process, creating and maintaining deliverables
- ☐ Conduct detailed technology, cost and risk evaluations for new technologies

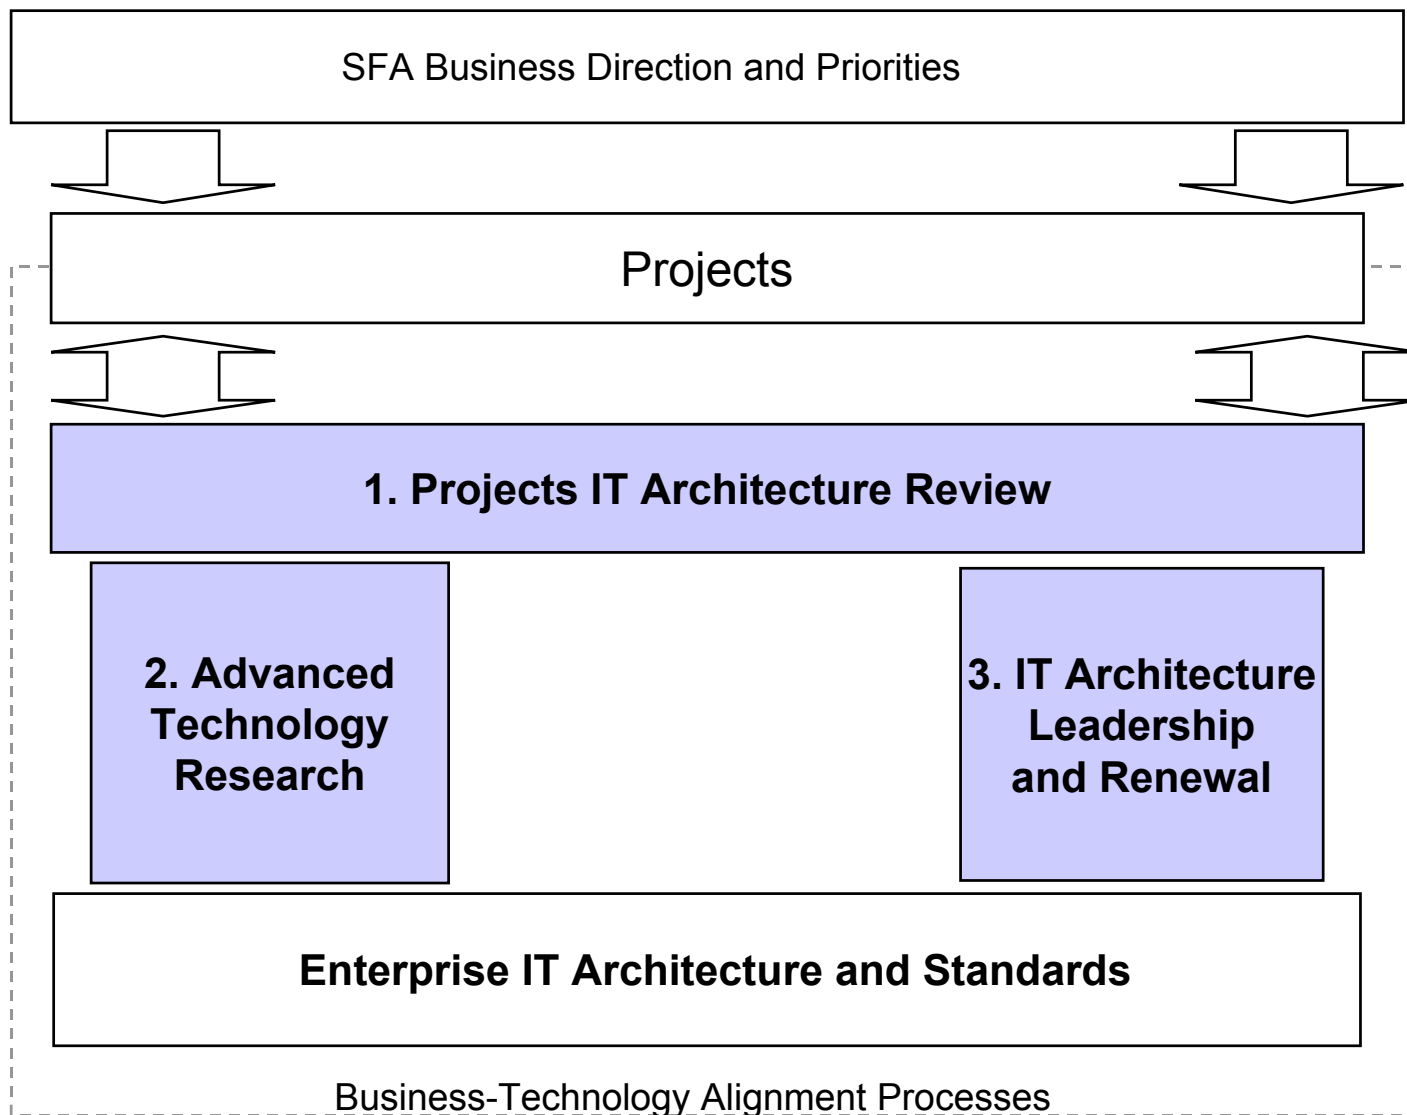

The Architecture Working Group will be staffed with senior representatives from business and IT.

Role	Representative
Business Unit Representatives	<ul style="list-style-type: none">■ Robert Lawrence - Students Channel■ Anna Allen - Financial Partners Channel■ Paul Hill - Schools Channel■ Paul Stonner - CFO
SFA Business Integration Representative	■ TBD
SFA CIO EITM Representative	■ Denise Hill
Mod. Partner Business Integration Representative	■ John Bogaski
Mod. Partner Chief Technical Architect	■ Peter Elms

BTA* consists of three major processes that help align design, integration and deployment of technology solutions to Enterprise standards.

BTA* Processes at SFA

We need your support to achieve aggressive time targets.

Timetable

Activity	Date	Who
Identify BU AWG representatives	Oct. 17	GMs
Distribute material for review to BU AWG reps.	Oct. 25	Denise Hill
AWG walk-through (orientation)	Oct. 30	SMEs & BTA Team
SMEs review material and provide comments	Oct. 30 – Nov. 1	SMEs
Ramp-up and execute (Phase II)	Nov. 5 – Aug. 2002	SMEs & BTA Team
- AWG launch		
- Implement support organization and tools		
- Execute and support BTA processes		

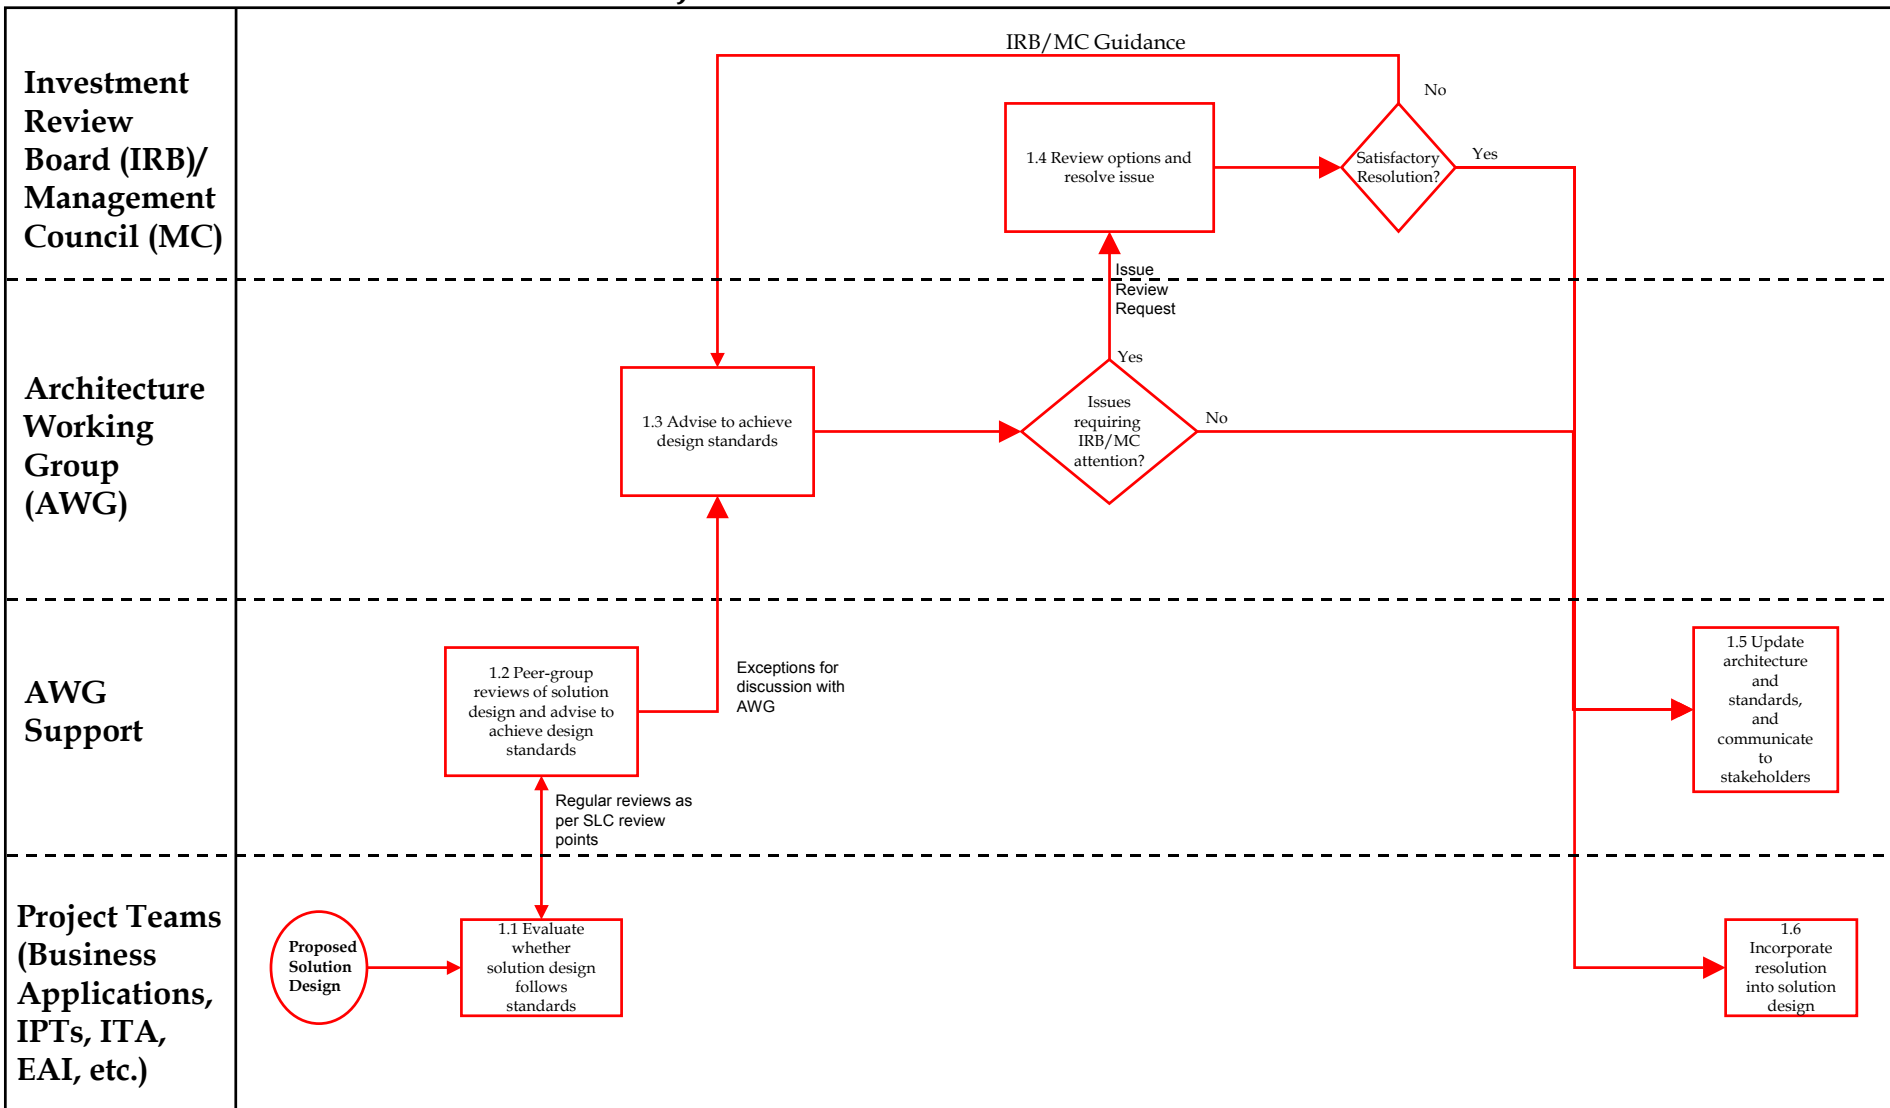

Appendix: Business-Technology Alignment Processes

The Projects IT Architecture Review Process allows for fair consideration of exceptions to the solution design and architecture standards.

1. Projects IT Architecture Review Process

The Advanced Technology Research process enables new-technology decisions based on business value.

2. Advanced Technology Research Process

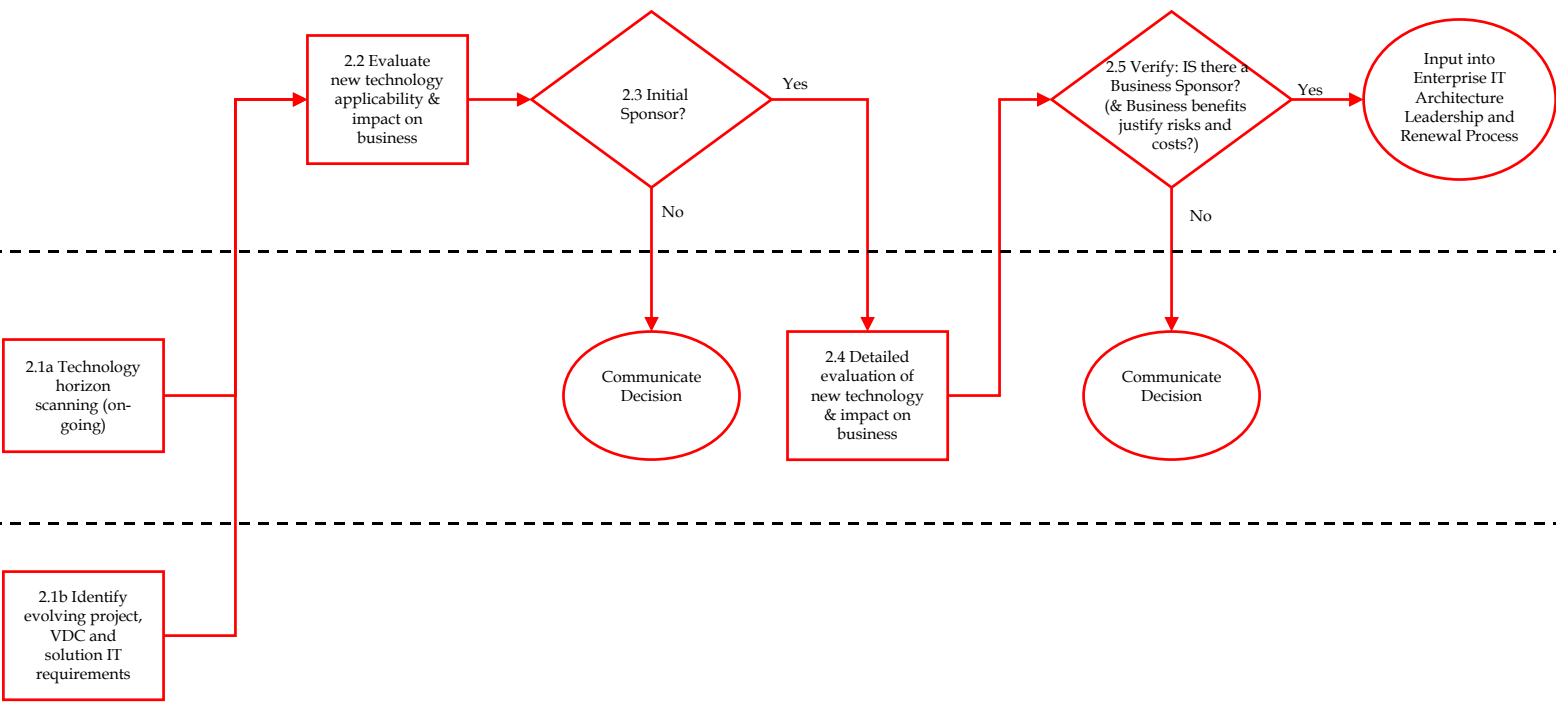

Function

Investment Review Board (IRB)/ Management Council (MC)

Architecture Working Group (AWG)

AWG Support

Project Teams (Business Applications, IPTs, ITA, EAI, etc.)

The Architecture Leadership and Renewal process ensures that the architecture remains aligned with changing business needs and priorities.

Function

3. Enterprise IT Architecture Leadership and Renewal Process
